

# Jakub Sukiennik

## Contact

**Date of birth:** 12.07.2000

**Phone:** +48 575 558 339

**E-mail:** kuba1207710@gmail.com

**Address:** Ludwika Kubali 3,  
34-600 Limanowa

**Github:** [github.com/fdxs-alt](https://github.com/fdxs-alt)

## Skills

**React&Redux**

**JavaScript (ES6)**

**TypeScript**

**RWD**

**Node.js with Express.js**

**Web sockets - Socket.io**

**Auth, JWT**

**MongoDB, Mongoose**

**Apollo GraphQL (Client + Server)**

**HTML, CSS**

**ORM: TypeORM, Sequelize**

**Basic knowledge of SQL**

**Linux Environment**

**Version control: Git**

**Industry knowledge**

**Web Development, Scrum**

## Languages

**English C1**

**German B2**

## Interest

**New Technologies**

**Bodybuilding**

## Objective

I'm 20 years old student of Cracow University of Technology. Programming became my passion about 1,5 years ago. I mostly focus on web development, but I also interested in other technologies like C++. I'm planning on developing my web skills by learning microservices and expanding my knowledge in Telco industry. I found myself hardworking and dedicated person.

## Education

**2019 – now (BSc)**

Cracow University of Technology

Computer Science

## Projects

**Chat App** – application build with React on client side. Express with Socket.io on backend with NoSQL database MongoDB. Application allows logging in and registering new user, creating chatrooms, sending messages in real time. Authentication is based on JWT

github: [github.com/fdxs-alt/ChatApp](https://github.com/fdxs-alt/ChatApp)

**Hotel App (only backend)** – application build in Express with Typescript with ORM Sequelize (Postgres as DB). It allows making reservation, creating hotels and rooms, contacting the owner, booking rooms, adding opinions and adding images via Multer.

github: [github.com/fdxs-alt/Hotel-App](https://github.com/fdxs-alt/Hotel-App)

**Job Offers App (work in progress)** – application which is supposed to be copy of the [nofluffjobs.com](https://nofluffjobs.com) page and provide all functionality given by original page. Project is built with GraphQL with ApolloGraphQL client and server. I'm also using TypeGraphQL and TypeOrm as part of Typescript stack.
